NORTHERN RAILWAY

Headquarters Office,
Baroda House,
New Delhi.

No.198-W/e-Gov/TMS/NR-Implmnt

Dated 30.09.2013

DRM/Engg.,
Northern Railway,
DLI, FZR, LKO, MB & UMB.

Sub: Implementation of Track Management System (TMS)- Stoppage of Paper records/registers.

Ref: This office letter of even No. dt. 21.03.2013.

1. TMS has been implemented on Northern Railway. Board, while conveyed approval for implementation of TMS, indicated that only following registers were to be withdrawn:-

1. Curve inspection register
2. Point and Crossing Inspection register
3. Level crossing register
4. LWR register
5. Welding register
6. Rail/Weld failure register
7. Toe load measuring register
8. Push Trolley/ foot plate/rear window inspection register
9. Rail/Sleeper/Fastening/Ballast inspection registers
10. Sand hump register
11. Gap Survey register
12. USFD register
13. TRC register
14. OMS register
15. Track Diagram

2. It was seen during inspections that documents like gang charts, gang diaries & level crossing inspection booklet were discontinued while no instructions for withdrawing such documents were ever issued. These documents are for information/compliance by track maintainers & gate keepers who are not expected to use TMS.

3. Above lapse shows lack of understanding of TMS by divisions. This also shows lack of proper inspection at higher level.

4. Please confirm that only registers mentioned in Para-1 above have been withdrawn and all other documents as per IRPWM/CE's circulars are available in field.

5. Your reply should reach this office by 10.10.2013.
