**Sub- Systemic Improvement.**

During preventive Vigilance checks it has been observed that No. of units in construction Organization, Project Organization and Divisions were using drawing No. NR/S&T/CON/2.7/97 for Construction of foundation of Location Box single. The photocopies of this drawing were found to be having different dimensions of the foundation in different contracts. This can result in awarding of contracts at higher rates by using LAR of contracts where dimensions are higher and including drawing of lesser dimensions in the tender document. Moreover, the quality of work may also get compromised by following a drawing which is in deviation from the approved drawing.

The same can be avoided if the copies of the drawing used in field are authenticated by a competent authority by comparing with the original.

You are advised to ensure that drawing for incorporating in the tender document for construction of foundation of location box single are being authenticated by a Competent Authority by comparing with the original to avoid deviation from the approved original drawing. The competent authority in this case shall be executive of the field i.e. Dy.CSTE or Sr.DSTE as the case may be.
