No. 213-Elect./P/System improvement/129

Dated: 08.01.2019

Sr. Divl. Elect. Engineer/G,
Northern Railway,
NDLS, FZR, LKO, MB & UMB

Sub: Issue of system improvement to prohibit the domestic utilization of emergency supply in Railway quarters.

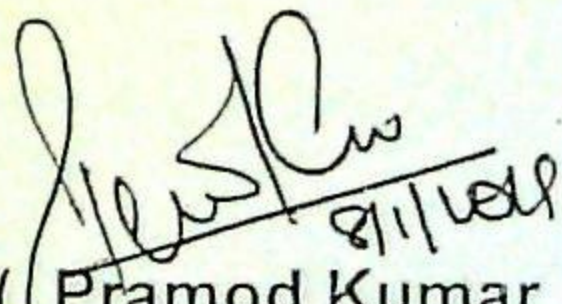

Ref: Dy.CVO/Elect.'s letter n. VIG/CT/V3/2016/05/02612 dated 18.12.2018.
01/06/19

It has been observed that Emergency Supply (Diesel Generator supply) is being used in the Railway accommodations.

Following system improvements are suggested:-

- i) Since production cost of the Emergency supply is very high, so it should be used for only emergency purpose as per policy i.e. at Railway Station emergency works, lifts supply etc.
- ii) A drive must be launched under the guidance of Railway officers, so that use of unauthorized emergency supply may be prohibited.
- iii) All supervisory staff/ incharge should be strictly instructed to prohibit use of emergency supply in Railway accommodations.
- iv) As above issues has conveyed by Dy. CVO/Elect. through above referred letter, so it should be ensured at the earliest for proper use of emergency power supply.

In view of above, all Branch offices are advised to convey these instructions to their subordinate to take corrective actions and to ensure its strict compliance. A line of confirmation may please be sent to this office as acknowledgement.

(Pramod Kumar)

Chief Electrical General Engineer
