Sub: - Incorporating of condition for provision of payment in stages for execution of N.S. items which require heavy investments.

During a vigilance check in execution of a work it has been noticed that part payment for a N.S.item has been made on procurement of material at site by the contractor, whereas there was no such condition for part payment was exist in tender schedule.

In view of above, it is requested that instructions may be issued to all field officials to get incorporated the condition in the tender schedule itself for the payment in stages for execution of such N.S.items which require heavy investigation in initial stages of execution of the item, as has already been done in some USSOR items. This will not only ensure smooth progress of work but also avoid unnecessary infringement of contract conditions by the field officials.

The receipt of the letter may be acknowledged and action taken should be intimated to this office.
